Dear Hiring Manager,

I am writing to express my interest in DevOps/Site Reliability Engineering positions at your organization.

I began my journey at Accenture as a Frontend Developer, but my genuine curiosity for technology quickly pushed me beyond just UI work. I've always had a habit of diving deeper to understand how things work end-to-end rather than limiting myself to a specific role. This mindset has shaped my growth over the past 3+ years. Today, I'm part of a GenAI project where I work as a DevOps/SRE Engineer, managing deployments, handling incident resolutions, and collaborating across teams to troubleshoot complex application issues.

What sets me apart is that my learning doesn't stop at the workplace. After my 9-5, I dedicate time to hands-on projects that help me explore new tools, technologies, and ideas. This continuous learning attitude, combined with my adaptability and problem-solving abilities, makes me confident that I can be a valuable asset to your team, both as a contributor and a quick learner who thrives in dynamic environments.

I hold certifications in Microsoft Azure Fundamentals (AZ-900), Azure Administrator Associate (AZ-104), and DevOps Engineer Expert (AZ-400).

Thank you for considering my application. I look forward to the opportunity to speak further.

Sincerely,

Alankrita Mohapatra
